AMI Marine Formally Appointed as Fendequip Official Distributor

Fendequip has formally appointed AMI Marine as a distributor for their range of Polyform fender covers.

Fendequip fenderCovers are specially designed to protect the topsides from fender scuff and help avoid costly gel coat repairs. Each fenderCover is manufactured from Fendequip's very own special premium, loop-knit acrylic fabric.

The fenderCovers are stain resistant, non-abrasive, extremely durable and have proven resistance to ultraviolet light.

AMI's Managing Director, Vince Tranchita, said that the company was looking forward to a long and successful partnership with Fendequip.

"Fendequip produces great quality products and we are delighted that they have selected AMI as a distributor", he said.

AMI Marine is Australia and Southeast Asia's leading wholesale distributor and specialist agent for many of the world's leading marine, electronic, offshore and safety products. With headquarters in Perth, the company has offices in multiple locations across Australia and in Southeast Asia.
