

## Oceanair Launches New Designer Venetian Blind Slat Collection

Oceanair have launched a new Designer Venetian blind slat collection aimed especially at superyacht designers and interior specialists.

Classically simple Venetian blinds are increasingly popular with superyacht owners and designer, especially due to its ability to create onboard atmosphere and mood through simply diffusing light through a chosen slat.

Inspiration for the collection has been drawn from diverse areas - from nature to the automotive industry - and features a wide collection of materials from luxurious natural varieties of wood, leathers and bamboos to powerful aluminium metallic colours.

The new collection aims to meet every interior design need and inspire through its variance and choice. From exotic bamboo and glossy or matt finishes to frosted laminated slats, the very latest tastes and trends are tailored for, meaning any desired style and environment can be achieved onboard any superyacht.

The new range will be available in 2014 through Australian distributor AMI Marine.
